

HYBRID PROFILE 2023

VP600

110 CRM

Recommended established population (plants/ha)

GRAIN 80-95K
SILAGE 80-105K

Seeding rates may need to be increased to compensate for reduced establishment field losses

Packed with advanced genetics delivering strong standability, foliar health and staygreen for yield stability and a wide harvest window. VP600 exhibits outstanding drought tolerance and a well-rounded disease package. Will perform in northern production regions where it should be planted early in moderate to high potential situations.
